

Wyatt Harris

Gainesville, FL | (314) 964-1815 | wharris2023@gmail.com | www.linkedin.com/in/wyatt-harris-2123swe

EDUCATION

Bachelor of Engineering in Computer Engineering

August 2023 - May 2027

University of Florida | Gainesville, FL

GPA: 3.3/4.0

Relevant Coursework: Data Structures & Algorithms, Circuits 1, Discrete Structures, Computer Organization, Computational Linear Algebra, Digital Logic, Software Engineering

TECHNICAL SKILLS

Languages: Python, C++, Java, JavaScript, HTML/CSS, MATLAB, ARM Assembly

Developer Tools: GitHub, Git, VS Code, JetBrains, Jupyter Notebook, Google Colab

Frameworks & Libraries: Pandas, Seaborn, Matplotlib, SciKit-learn, React, Next.js

Cloud & Databases: Supabase, SQL

Hardware and Simulation: Waveforms, LTSpice, FPGA Development, Soldering

EXPERIENCE

Undergraduate Researcher

August 2025 – Present

University of Florida | Gainesville, FL

- Developing a **full-stack** web dashboard using **Next.js** and **React** (with TailwindCSS) to transform **predictive modeling** results into actionable insights for students seeking internships.
- Implementing backend data pipelines with **Flask/Next.js API** integration to deliver real-time model outputs to the frontend interface.
- Designing **interactive visualizations** and recommendation features to help students identify personalized areas of improvement (e.g., GPA, experience, activities) that increase their chances of securing internships.
- Collaborating with co-researchers to translate statistical findings into a scalable, user-friendly application accessible beyond academic publications and beneficial to students.

Undergraduate Researcher

February 2024 – June 2025

University of Florida | Gainesville, FL

- Developed a **Random Forest classifier** using **Python, Pandas, Matplotlib, Seaborn**, and **Scikit-learn** to predict student internship participation, achieving **71% accuracy** and an **ROC-AUC of 0.77**, and identified key predictive factors
- Designed **data visualizations** to communicate model performance and trends, enabling clearer insights into factors affecting internship acquisition.
- Co-authored** a peer-reviewed research paper on predictive **machine learning** modeling for student internship outcomes, using **LaTeX** to professionally format and publish results.

RELATED PROJECTS

Audio Amplifier, Circuits 1 | Waveforms, LTSpice, Soldering, Breadboarding

June 2025 – July 2025

University of Florida | Gainesville, FL

- Took a low-amplitude jingle with an FC offset as an input and passed through 4 stages to produce an audible and clear output through a speaker.
- The 4 stages were a high-pass filter, a gain stage, a buffer stage, and a peak detector.
- The circuit was first designed on a breadboard, then later transferred over to a PCB where all the components were soldered to the board.

LEADERSHIP AND INVOLVEMENT

Founder/Executive Board

January 2024 – Present

Epsilon Tau Pi Service Fraternity | Gainesville, FL

- Served as Social Chair, Rush Chair, and Regional Delegate during the founding year of our colony.
- Served as Fraternity Education Officer during the second year of the colony.

Systems Team Member

July 2024 – Present

UF Design, Build, Fly Club | Gainesville, FL

- Learning to solve different systems problems with RC plans based on the given problem

AWARDS/HONORS

Eagle Scout

March 2023
